

Remote Fob Programming (Plips) – Peugeot and Citroen

Following transponder key programming it may be necessary to learn the high frequency remote locking PLIP feature. The procedures for each model are detailed below.

206, 406, Xsara and Xantia Deadlocking (2 button PLIP)

- Unlock all doors using a working key.
- Depress and hold the large PLIP button for 20 seconds while the LED is flashing.
- While still holding down the large PLIP button, press the smaller deadlocking button once. The LED will stop flashing at this point.
- Release, and press the large PLIP button once and the LED will extinguish.
- Insert the key in the ignition barrel and switch to the ON position, wait 10 seconds then switch to OFF
